Experience

2023

Full Stack Development Summer Intern, Intelligrit

- Developed tools implementing OpenAI and Anthropic into project workflows, speeding up development time.
- Created an upload solution allowing users to submit files to a ScyllaDB database and a Minio object storage.
- Quickly developed a proof of concept for switching the codebase from an asynchronous to a non-asynchronous Bottle implementation.

Education

2020 - 2024

Bachelor of Science, Computer Science, University of Florida

GPA: 3.4

- Data Structures & Algorithms COP3530
- Intro to Computer Organization CDA3101
- Applied Discrete Structures COT3100
- Intro to Software Engineering CEN3031 (In Progress)

Skills

- | | |
|--|--|
| • C++ Intermediate | • D2 Beginner |
| • Python3 Intermediate | • ScyllaDB (Cassandra compatible) Beginner |
| • Java Beginner | • HTMX Intermediate |
| • Git Intermediate | • Bootstrap5 Intermediate |
| • Redis Intermediate | • Jinja2 Intermediate |
| • Minio (s3 compatible) Intermediate | • ELEGOO Cura Intermediate |
| • Docker Beginner | • Make beginner |

Activities

- Active member of the Society of Software Developers at the University of Florida.
